The heart of the matter

As sequencing technologies continue to improve and applications expand, the need for compatibility with everdecreasing input amounts and sub-optimal sample quality grows. Reliability and high performance are critical, along with faster turnaround, higher throughput and automation compatibility.

The NEBNext Ultra II workflow lies at the heart of NEB's portfolio for next generation sequencing library preparation. NEBNext Ultra II kits and modules for Illumina are the perfect combination of reagents, optimized formulations and simplified workflows, enabling you to generate DNA or RNA libraries of the highest quality and yield, even when starting from extremely low input amounts.

The central NEBNext Ultra II Workflow:

Advantages of the Ultra II Workflow:

- Learn one central workflow and apply it to a suite of different applications
- Save time with streamlined modular workflows, reduced hands-on time and automation compatibility
- Benefit from low input amount requirements, fewer PCR cycles and uniform GC coverage in all applications

What users are saying:

“ NEB is currently the only company, which is offering really ``automation friendly`` library preparation kits. The volumes of components are calculated to cover for unavoidable deadvolumes, reactant volumes are in range of most automated platforms. The stability of the NEBNext chemistry allows a broad range of automation strategies ”

– Dr. Jürgen Zimmermann,
Senior Engineer - Automation
GeneCore EMBL Heidelberg, Germany

The NEBNext Ultra II Workflow

The Ultra II workflow is available in a convenient kit format, or as separate modules – it is easily scalable and automated on a range of liquid handling instruments. The NEBNext Ultra II workflow has been cited in thousands of publications, and was also used in COVID-19 related research and surveillance sequencing. Citation information and extensive performance data for each product is available on www.neb.com.

Choose the convenient

NEBNext Ultra II DNA Library Prep Kit for:

- Whole Genome Sequencing
- Standard & Low Input Sequencing
- Exome Capture
- ChIP-seq, NICE-seq, Cut&Run-seq
- Targeted Sequencing
- cfDNA

The Ultra II DNA* Workflow
is Available in Convenient Kit Formats or Modules:
